Prezi

READING DIGITAL BASED TEXT

We are testing students using digital means, but we're **not** teaching the the skills of reading digitally.

BUT THEY'RE ALL GADGET WIZZES!

Just because a student knows how to work a device, doesn't mean they know how to *learn* from it.

Non-Fiction Printed Books vs. Technology

Connected devices don't replace books …
they **DESTROY** them!

- Look up definitions instantly
- Can Copy/Paste
- Take notes
- Highlight Passages
- Click on hyperlinks

Old School   VS   New Age

Takes learning to a whole new level of thinking, searching, creating and organising

- Now being cited in bibliographies and college curricula

BUT HOW CAN I TELL THE DIFFERENCE BETWEEN A GOOD ARTICLE AND A BAD ONE?

- Good Article Criteria
- Assessment Quality Scale

Prezi

BUT HOW CAN I TELL THE DIFFERENCE BETWEEN A GOOD ARTICLE AND A BAD ONE?

Class	Criteria	Reader's experience	Editing suggestions	Example
★ FA	The article has attained featured article status by passing an official review. **More detailed criteria** [show]	Professional, outstanding, and thorough; a definitive source for encyclopedic information.	No further content additions should be necessary unless new information becomes available; further improvements to the prose quality are often possible.	Water fluoridation (as of August 2014)
⊘ A	The article is well organized and essentially complete, having been reviewed by impartial reviewers from this WikiProject or elsewhere. Good article status is not a requirement for A-Class. **More detailed criteria** [show]	Very useful to readers. A fairly complete treatment of the subject. A non-expert in the subject would typically find nothing wanting.	Expert knowledge may be needed to tweak the article, and style problems may need solving. Peer review may help.	Battle of Nam River (as of June 2014)
⊕ GA	The article has attained good article status by passing an official review. **More detailed criteria** [show]	Useful to nearly all readers, with no obvious problems; approaching (but not equalling) the quality of a professional encyclopedia.	Some editing by subject and style experts is helpful; comparison with an existing featured article on a similar topic may highlight areas where content is weak or missing.	YouTube (as of August 2014)
B	The article is mostly complete and without major problems, but requires some further work to reach good article standards. **More detailed criteria** [show]	Readers are not left wanting, although the content may not be complete enough to satisfy a serious student or researcher.	A few aspects of content and style need to be addressed. Expert knowledge may be needed. The inclusion of supporting materials should also be considered if practical, and the article checked for general compliance with the Manual of Style and related style guidelines.	Apple Inc. (as of August 2014)
C	The article is substantial, but is still missing important content or contains much irrelevant material. The article should have some references to reliable sources, but may still have significant problems or require substantial cleanup. **More detailed criteria** [show]	Useful to a casual reader, but would not provide a complete picture for even a moderately detailed study.	Considerable editing is needed to close gaps in content and solve cleanup problems.	Bishop (chess) (as of August 2014)
Start	An article that is developing, but which is quite incomplete. It might or might not cite adequate reliable sources. **More detailed criteria** [show]	Provides some meaningful content, but most readers will need more.	Providing references to reliable sources should come first; the article also needs substantial improvement in content and organisation. Also improve the grammar, spelling, writing style and improve the jargon use.	Interval vector (as of February 2014)

Apollo 13

From Wikipedia, the free encyclopedia

This article is about the Apollo mission. For the film based upon it, see Apollo 13 (film)

Apollo 13 was the seventh manned mission in the American Apollo space program and th
was launched on April 11, 1970, at 13:13 CST from the Kennedy Space Center, Florida, b
tank exploded two days later, crippling the Service Module (SM) upon which the Comman
caused by limited power, loss of cabin heat, shortage of potable water, and the critical nee
the crew returned safely to Earth on April 17.

The flight was commanded by James A. Lovell with John L. "Jack" Swigert as Command
Pilot. Swigert was a late replacement for the original CM pilot Ken Mattingly, who was gro
German measles.
